

Tools Needed:

- Phillips screwdriver
- Rubber mallet (Optional)

Step 1: Remove the 4 top screws on upper joints.

Step 2: Loosen the joints to get the screw out.

Step 3: Detach the pull handle.

Illustration: Pull handle removed.

Step 4: Remove the 4 screws on lower part of upper joints indicated by the red arrows.

Step 5: Detach the upper joint assembly as shown below.

Step 6: Upper joint assembly removed.

Step 7: Install the new upper joint assembly and secure it to the frame.

Step 8: Reinstall the pull handle back into place.

Step 9: Tighten all 8 screws for the upper joint assembly.

The End: Congratulations, you have successfully replaced the upper joint assembly!
